Subject: Iowa FFY2013 annual NPS report questions

Steve,

I finished reviewing your Annual Progress Report. Thank you for putting so much time into the revisions. The new tables on Match funds and water quality trends are great and just what I needed this year. I have just a couple of follow up questions:

1. Did you include the total load reductions somewhere?
2. Goal 2.5, #4: The question on number of website hits was not answered. This was the original measure in the plan but was not reported.
3. Just curious – which watershed project is funding Central Park Lake? I saw it in the water quality trends table.

Steve,

Attached are my specific comments on the 2013 Annual Progress Report. The setup of this document is excellent for reporting out on your MPSMP milestones and activities. However, you also want to consider whether this document is the place to report on some of the 2013 overview milestones for your program. I'm thinking of many of the PPD checklist items. You do not have to report all of those items in this report, but it is a good place for many of them. Refer to the PPD checklist for reference.

These are the items from the PPD that I think would be appropriate to include in the Annual Progress Report:

- Matching funds for the year
- 2013 total load reductions
- Water quality improvements (not just success stories, but incremental improvements)

Subject: Iowa FFY2013 annual NPS report amended

Leah and Benita,

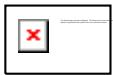

Attached is an amended Iowa FFY2013 NPS annual report, which incorporates revisions to the reporting for Goal 3, Objective 4 on page 39, pertaining to TMDLs completed.

This amended version also includes the corrected completion dates for each action step, since the completion dates had been moved back one year to allow for at least one full year of implementation to report on following EPA's official approval of the NPSMP in late summer of 2012. (The previously submitted report did not include the corrected completion dates).

Please contact me with any questions or comments.

Thank you.
